### BEFORE

### AFTER

### COPLASTIX® TECHNOLOGY IS THE PERFECT SOLUTION TO GATE-RELATED HEADACHES

Transform your corroded, inoperable gates into pristine, smooth operating, non-corroding gates and put your fluid control system back into operating condition.

When you retrofit your troublesome cast-iron, aluminum, stainless steel and fiberglass gates with trouble-free Coplastix technology, you effectively eliminate 90 percent of potential gate problems. Coplastix technology eliminates the problem of frozen gates because Coplastix material will never corrode and reduces gate friction by a factor of 10. Plus, Coplastix technology is exceptionally watertight, exceeding AWWA requirements.

Coplastix technology is not subject to thermal expansion and can be used in ambient temperatures ranging from 50°F below zero to plus 180°F. To put it simply, Coplastix is miraculously trouble-free.

### Coplastix® is the Industry's Most Trouble-Free Method of Fluid Control

*Contact your Ashbrook Simon-Hartley representative, today, to learn how your gates can be transformed into something...well, beautiful.*

IT'S AS CLOSE TO A MIRACLE AS IT GETS WITHOUT  
DIVINE INTERVENTION

## RETROFIT YOUR TROUBLESOME CAST-IRON, ALUMINUM, STAINLESS STEEL AND FIBERGLASS GATES WITH TROUBLE-FREE COPLASTIX® TECHNOLOGY

- *Corrosion-Free*
- *No Exercising Required*
- *10 Times Less Friction Than Metal-to-Metal Gates*
- *Trouble-Free Installation With Over 25 Years of Service*
- *Weighs One-Fifth of Similar Cast Iron Products*
- *Operates Easily With Smaller, Less Expensive Actuators*
- *Can Be Used In Ambient Temperatures Ranging From 50° F Below Zero To Plus 180° F, Without Concern*
- *Smooth Surface Is Easy To Clean*
- *Exceptionally Water-Tight and Exceeds AWWA Requirements*
- *Not Subject To Thermal Expansion*
- *NSF® Certified Materials*

**Coplastix®** is the  
Industry's Most  
Trouble-Free Method  
of Fluid Control
